

DATASHEET

Pressure chamber 50 Bar

A large, stationary low pressure vessel is available at CMR intended for ordinary pressure testing of oceanographic equipment. MWP=5MPa. This vessel has three inspection windows and an electrical feed-through.

CMR's low pressure chamber is one of a range of facilities that is available to clients. In addition we can offer high pressure chambers (including combined pressure and temperature testing), temperature test chambers, vibration testing and a variety of flow rigs for gases and liquids.

SPECIFICATIONS	
Make & type	CMR / BMV
Pressure range	0 to 50 Bar
Volume	Ca. 1200 litre
Internal dimensions	2 m x 0.9 m (length x diameter)
Medium	Water
External access ports for cabling	4 wire electrical
Further information	CMR.Test.Centre@cmr.no
